SECURITY ■ RISK MANAGEMENT

ACTIVECYBER AT A GLANCE

ACTIVECYBER is a team of cybersecurity and risk management professionals headquartered in the Washington, D.C. area. We advise C-Suite, Executive Committee and Technology leadership on maturing and maintaining their cybersecurity posture. Since 2002, our leadership team has been relied upon to spearhead and resolve the most discrete cybersecurity matters.

ACTIVECYBER RESEARCH

ACTIVE Labs - Powered by ACTIVECYBER, LLC

ACTIVE Labs was created to hunt and research undiscovered vulnerabilities, report via responsible disclosure programs, publish advisories, develop and validate new patches, and to share this for the advancement of the cybersecurity community. Our mission is to secure our clients, partners, and the technology community as a whole.

We are actively providing the community with verified findings and research that leads to the creation of new **Common Vulnerabilities and Exposures (CVEs)** and updates to the **National Vulnerability Database (NVD)**.

Let ACTIVECYBER mature your cybersecurity posture. Call or visit online.
