SECURITY ■ RISK MANAGEMENT

## ACTIVECYBER AT A GLANCE

**ACTIVECYBER** is a team of cybersecurity and risk management professionals located in the Washington, D.C. area. We advise C-Suite, Executive Committee and Technology leadership on maturing and maintaining their cybersecurity posture. Since 2002, our leadership team has been relied upon to spearhead and resolve the most discrete cybersecurity matters.

## OUR EXPERTISE

ACTIVECYBER's team of advisors, engineers and subject matter experts are credentialed. We maintain industry-leading cybersecurity certifications to mature our client's posture, protect critical assets and demonstrate compliance.

## CLIENTS BY INDUSTRY

"ACTIVECYBER has helped us institute a program that includes advisory and assessment services, ongoing testing, and continuous monitoring and detection to ensure our people, processes, and technology are always ready for the next threat. We look forward to working with ACTIVECYBER and are happy to recommend them."

—Craig Shaffer, Senior Director,  
Association of American Railroads

"ACTIVECYBER has played a key role in helping the Brownstein law firm to harden our defenses while also guiding us along our multi-framework certification path. We get the 'A-Team' in every interaction; they don't seem to have a 'B-Team.' Aside from their technical prowess, and their clear understanding of the regulatory landscape, it's also been refreshing to witness how the relationship has matured so productively."

—Joe Craven, Chief Information Officer,  
Brownstein Hyatt Farber Schreck
